

NURSING CONFERENCE 2026

03 & 04 September 2026

Shaping future nurse leaders is a collective responsibility shared by clinicians and educators, as both play a vital role in developing the profession. Educators lay the foundation by nurturing leadership, critical thinking, and professional values, while clinicians model these skills in real practice settings through mentorship and guidance. By working together, they can bridge theory and practice, inspire confidence, and cultivate nurses who are prepared to lead ethically, adapt to complex healthcare environments, and drive positive change. This shared commitment ensures a strong pipeline of capable nurse leaders for the future.

This year's conference is on-site at Premier Hotel, OR Tambo International Airport, Johannesburg

Thank you
Nurses
